

WILLIAM MARTIN, P.E.

William “Lee” Martin, P.E. is a registered professional engineer for the Florida Department of Environmental Protection’s Solid Waste Section in Tallahassee. Lee has more than 18 years experience with the Department working in both the Waste Cleanup and Solid Waste program areas, starting in the Southeast District office in 1991 and relocating to Tallahassee in 2001. He assists the program in the development of rules and guidance for managing municipal solid waste and the District offices in evaluating plans for landfill designs, groundwater monitoring networks, landfill operation and closure, landfill redevelopment and waste beneficial use demonstrations. Prior to coming to the Department, he worked as an environmental engineering consultant for two years and as an Air Force civil engineer for 23 years.
